

EASLEY COMBINED UTILITIES

A Community Tradition

Commercial New Service Cost Contribution Policy

**Adopted by the Commission of Easley Combined Utilities
June 15, 2015**

This policy establishes the monetary contribution that Easley Combined Utilities will provide for the installation of electrical service to commercial premises. The contribution includes the cost of all primary and secondary electrical equipment, material and labor needed to establish electrical service.

For All Commercial Electric Service

If service is readily available from existing electrical infrastructure, service will be provided with no upfront charges to the customer. If extension of the electric system is needed to provide service to a commercial customer the cost of such extension will be the responsibility of the customer. Modification of this requirement can be made at the discretion of the General Manager.
