

## Where Do We Get Our Power?

The majority of ECU's power generation comes from the Catawba Nuclear Station in York County. As a member of the Piedmont Municipal Power Agency (PMPA®), ECU has an ownership interest in the Catawba Station.

### Locally-Owned. Locally Controlled.

Unlike many other areas in the Upstate, ECU has the freedom to manage rates locally, ensuring that we have the flexibility and control needed to continue meeting the energy demands of our city, and deliver electrical service at the best possible value for our customers.
